Md. Lotifur Rahman (Lizan)

Full-Stack Developer

Email || Linkedin || Portfolio || GitHub
Phone: +8801929562566
Present Address: Rangpur, Bangladesh

ABOUT ME:

Full-Stack Software Engineer with proven capability in architecting decoupled, production-grade cloud systems using React, TypeScript, Node.js, PostgreSQL, and MongoDB. Specialized in real-time WebSockets, Three.js WebGL graphics, relational Prisma modeling, and AI-driven workflow integrations.

SKILLS:

- **Frontend –** HTML5, CSS3, Tailwind CSS, JavaScript (ES6+), React.js, Next.js
- **Backend –** Node.js, Express.js, MongoDB (Mongoose), JWT authentication, Firebase (Auth, Hosting)
- **APIs –** RESTful API Design, Role-Based Access Control (RBAC)
- **Tools –** Git, GitHub, Postman, Thunder Client, Figma

EXPERIENCES:

Frontend Developer Intern
Omnimate (Software • AI • Automation) **| [Website] || [Certificate]**
Duration: April 2026 – June 2026 | Remote

- Translated business and technical requirements into high-performance, responsive client interfaces for production web systems.
- Coordinated with cross-functional backend contributors to design clean REST API contracts, input schemas, and state architectures.
- Conducted comprehensive cross-browser debugging, UI testing, and performance profiling across automation dashboard tools.
- Enforced Git feature-branch workflows, collaborative code reviews, and agile release practices in a fast-paced delivery environment.

PROJECTS:

1. **Eduportal (Team Project) Live Link || GitHub Link**
   - ★ **Tech Stack: Next.js, React, TypeScript, Firebase, REST APIs, AI Integration**

- Worked as a Frontend Developer in a team to build a large-scale school management platform using Next.js, React, and TypeScript.
- I implemented authentication-based navigation and an AI-powered chatbox to improve user support and interaction.
- Contributed as a full-stack team member, building role-based dashboards and integrating REST APIs.

2. **ViewRoom 360° — Spatial Web & 3D Interactive Platform | Live Link || GitHub**
   - ★ **Tech Stack: React 19, Node.js, Express.js, PostgreSQL (Neon Cloud), Prisma ORM, Socket.io, Three.js, Gemini AI**

- Engineered a decoupled cloud architecture hosting a high-performance React SPA on Vercel and an Express + Socket.io engine on Render.
- Modeled relational PostgreSQL schemas using Prisma ORM to manage multi-floor spatial node graphs, custom blur hotspots, and 3D product variants.
- Implemented end-to-end security with JWT token verification, CORS origin isolation, Cloudinary 8K CDN storage, and an interactive Recruiter Sandbox.

LANGUAGE: English, Bangla, and Hindi.
